Advice

The stickers should not be placed where the physical contact may damage them. You are advised to print the stickers on photographic adhesive paper (it is more expensive than the normal paper but a high-quality will be obtained and the damage of the stickers will be delayed).

How to participate?

1.- You can send your sticker/s to jalbusac@gmail.com

Where to buy high quality Linux stickers?

www.it2l.com

The banner features the following elements from left to right: the 'it2l' logo, the text 'Goodies GNU/Linux et logiciels libres', the Debian logo, a circular logo with a penguin, the website 'www.it2l.com', the Tux penguin mascot, a sun-like logo, and a list of merchandise: '- T-Shirts', '- Stickers', '- Portes Clefs', and '- Tapis de souris'.

What is Free Software?

“Free software” is a matter of liberty, not price. To understand the concept, you should think of “free” as in “free speech”, not as in “free beer”.

Free software is a matter of the users' freedom to run, copy, distribute, study, change and improve the software. More precisely, it refers to four kinds of freedom, for the users of the software:

- The freedom to run the program, for any purpose (freedom 0).
- The freedom to study how the program works, and adapt it to your needs (freedom 1). Access to the source code is a precondition for this.
- The freedom to redistribute copies so you can help your neighbor (freedom 2).
- The freedom to improve the program, and release your improvements to the public, so that the whole community benefits (freedom 3). Access to the source code is a precondition for this.
